MARKET REVIEW

The Department on January 18 allocated to individual foreign countries sugar imports for the second quarter of 1967. The import authorization of 1,000,000 tons for that period brings the total for the first half of the year to 1,900,000 tons. This compares with 1,838,000 tons actually imported in the first half of last year and to 1,582,000 tons in the corresponding period of 1965.

More sugar was sold during 1966 in the United States than in any other year, and on a per capita basis, consumption appeared to be only fractionally below the record for recent years established in 1962. The preliminary report of sugar deliveries for U. S. consumption totaled 10,301,000 tons including approximately 70,000 tons of constructive deliveries upon which physical shipment will occur in the first two months of the current year. In the first two months of 1966, 37,000 tons were physically delivered against constructive deliveries of 1965. Accordingly, physical deliveries of sugar in 1966 amounted to about 10,268,000 tons. This is equivalent to about 104 3/4 pounds per person.

It is interesting to note that sugar deliveries during the last quarter of 1965 and the first quarter of 1966 were more than 200,000 tons in excess of normal expectations for that period. Since then they have been about on trend.

A total of 10,357,000 tons were charged against 1966 quotas which totaled 10,375,000 tons. Most of the shortfall was represented by one cargo from the Philippines which arrived on January 1, 1967. The charges to quotas exceeded reported distribution by just about the assumed refining loss for the year. Apparently, inventories of quota sugar held by refiners and importers at the end of the year were of the same order as at the beginning when they totaled 548,000 tons.

Deliveries during the first two weeks of January 1967 were reported as 289,000 tons. Assuming that some constructive deliveries from 1966 were also physically delivered, it would appear that total deliveries of sugar were about in line with consumption for that period.

Domestic raw sugar prices averaged 7.11 cents per pound during the first three weeks of January 1967. The wholesale price quotation for refined cane sugar in the Northeast remains at 10.60 cents per pound. For January 1966 the domestic raw sugar price averaged 6.88 cents and the refined price in the Northeast averaged 10.35 cents.

Wholesale refined quotations were unchanged during the period January 3-24. As of January 24 the following were the quotations by territories:

|                           | <u>Cane</u>                                  | <u>Beet</u> |
|---------------------------|----------------------------------------------|-------------|
|                           | <u>Cents per pound in 100 lb. paper bags</u> |             |
| Northeast                 | 10.60                                        |             |
| Southeast                 | 10.20                                        |             |
| Gulf                      | 10.20                                        |             |
| Eastern beet              |                                              | 9.65        |
| Chicago-West              | 9.85                                         | 9.65        |
| Direct shipment territory | 9.75                                         | 9.55        |
| Lower Pacific Coast       | 9.95                                         | 9.95        |
| Northwest Intermountain   | 9.85                                         | 9.85        |

Sugar production from the 1966 crop in Louisiana is completed and totaled about 562,000 tons. Florida sugar production is now estimated at 610,000 tons or a total of 1,172,000 tons for the mainland cane area. Only about half of the Florida production has been completed to date.

With Louisiana production about 10,000 tons more than 1966 marketings, effective inventory at the beginning of 1967 was about 167,000 tons as compared with 157,000 tons in 1966. Based on the current production estimate, the Florida effective inventory will be about 60,000 tons larger than the 510,000 tons of last year.

Calendar year 1966 sugar production in the domestic beet sugar area totaled 2,827,000 tons, of which 827,000 tons were 1965 crop sugar and 2,000,000 tons 1966 crop sugar. With deliveries at 3,024,000 tons, year end physical inventories of 1,518,000 tons were 197,000 tons smaller than at the end of 1965.

The world raw sugar price dropped to 1.23 cents per pound on January 6. This was the lowest price at any time in the last twenty-five years. By January 23 the price had recovered somewhat to 1.40 cents per pound. The 1966 calendar year average price of 1.86 cents per pound was also the lowest yearly average in the last twenty-five years.

The International Sugar Council will hold its first session under the new two-year protocol at London on February 27.

### USDA Announces Authorization of Raw Sugar Imports During Second Quarter:

---

The U. S. Department of Agriculture on January 18, 1967 authorized the importation of 1,000,000 short tons, raw value, of sugar during the second quarter of 1967.

The allocation to countries was made pursuant to criteria established in Sugar Regulation 811 as published in the Federal Register Dec. 10, 1966.

Applications were approved by giving first priority to bringing importations from each country in the first 6 months of this year up to the average for the years 1963, 1964, 1965, and 1966; second priority to bringing first-half importations from countries up to 50 percent of their 1967 quotas; and third priority to prorating the balance in accordance with historical importations.

Importers or other applicants for quota set-asides are being notified of the disposition of their requests.

Quantities requested and approved for importation during the second quarter from each country are shown in the table on page

| Country             | : Second<br>: quarter<br>: applications<br>: received | Applications approved |                    |          | Total     |

1/ First half average imports 1963-66, less quantities approved for first quarter importation in 1967.

2/ To bring each country applying up to 50 percent of its ~~annual~~ quota; countries with smallest quotas considered first.

ADMINISTRATIVE ACTIONSDate announcedNature of action

December 22,  
1966

Announced an amendment of the regulations governing importations of sugar and butterfat and/or flour mixtures for the 1967 calendar year.

The amendment establishes the quantity of these mixtures which can be imported from each country during 1967. This amendment was proposed in a "notice of proposed rule making" which was announced Nov. 30 (USDA 3812-66). (See December 28, 1966 Federal Register).

December 22,  
1966

Announced 1967 sugar requirements and quotas for local consumption of 50,000 short tons, raw value, for Hawaii and 130,000 tons for Puerto Rico.

This action makes effective, without change, as of Jan. 1, 1967, the requirements and quotas set forth in a Notice of Proposed Rule Making issued on Dec. 2, 1966 (Press Release USDA 3854-66). (See December 28, 1966 Federal Register).

December 28,  
1966

Announced revisions of 1966 marketing allotments to mainland cane sugar processors.

The revised allotments are the result of determining deficits in allotments for some processors and the proration of such deficits to other processors able to market additional sugar. (See December 30, 1966 Federal Register).

December 30,  
1966

Announced preliminary marketing allotments to processors of a portion of the 1967 sugar quota for the Mainland Cane Sugar Area.

Date announcedNature of action

December 30,  
1966 (cont'd)

These preliminary allotments are based on a public hearing held on November 18, 1966 and generally provide for allotments of not less than 80 percent of 1966 allotments which became effective on July 27, 1966.

Preliminary allotments of a portion of the quota will be in effect until an order can be issued on the basis of a public hearing to be held early in 1967 for determining the method to be used in establishing final 1967 allotments. (See January 5, 1967 Federal Register).

December 30,  
1966

Announced the allotment to processors of 90 percent of the direct-consumption portion of the mainland sugar quota for Puerto Rico for the calendar year 1967 (See January 5, 1967 Federal Register).

January 6,  
1967

Announced that proportionate shares (acreage allotments) will not be established for the 1967 crop of sugarbeets. (See January 12, 1967 Federal Register).

January 6,  
1967

Announced a proposed amendment of the regulation governing the marketing of domestic sugar in the continental United States, Hawaii and Puerto Rico that will permit 2 processors to transfer title to equal quantities of sugar subject to a quota for the same area without charge to a processor's marketing allotment or the area quota until the sugar is physically delivered into regular trade channels.

Such exchanges will enable some processors to reduce freight costs on crosshauls and thereby in-

Date announcedNature of action

January 6,  
1967 (cont'd)

crease net proceeds which are shared by growers as well as processors.

This amendment was first proposed in the Federal Register of Nov. 18, 1966, and is now restated to clarify that the transfer of title must be effected simultaneously; that the sugar must then be in existence; and that no physical movement of sugar between the processors is necessary.

Opportunity is provided for submission of views and comments within 15 days after the Notice of Rule Making is published in the Federal Register. (See January 11, 1967 Federal Register).

January 6,  
1967

Announced a determination of fair and reasonable prices for 1966 and 1967-crop sugarbeets.

The fair price determination requires producer-processors to pay for 1966-crop sugarbeets at prices not less than those provided in contracts negotiated between producers and processors for that crop.

Prices for 1967-crop sugarbeets are to be not less than (1) those provided in 1967-crop purchase contracts as negotiated between processors and grower associations prior to the effective date of the determination, or (2) those provided in 1967-crop sugarbeet purchase contracts negotiated subsequent to the effective date of the determination unless it is determined by the Secretary that any such contract is more favorable to the processor than the 1966-crop contract as modified and applicable where 1967 contracts are not negotiated. If contracts are not negotiated, the prices to be paid for sugarbeets are

Date announcedNature of action

January 6,  
1967 (cont'd)

to be not less than those established by the determination.

The Sugar Act of 1948, as amended, requires producers who process sugarbeets grown by others to pay prices determined by the Secretary of Agriculture to be fair and reasonable as one of the conditions of eligibility to receive Sugar Act payments on their own production.

Public hearings were held in several locations of the sugarbeet area in December 1965 and in January 1966 in connection with 1966-crop sugarbeets and in Omaha, Nebraska, from November 15 to 18, 1966, in connection with 1967-crop beets, where interested persons were afforded the opportunity to present their views and recommendations. (See January 12, 1967 Federal Register).

January 11,  
1967

The Agricultural Stabilization and Conservation State Committees of six states issued bases and procedures for establishing proportionate share areas and/or farm proportionate shares for the 1966 crop of sugarbeets. (See January 11, 1967 Federal Register).

January 17,  
1967

The Agricultural Stabilization and Conservation State Committees of six additional states issued bases and procedures for establishing proportionate share areas and/or farm proportionate shares for the 1966 crop of sugarbeets. (See January 17, 1967 Federal Register).

STATISTICAL SERIES IN THIS ISSUEHIGHLIGHTS

1. December 1966 sugar deliveries for continental U. S. consumption 875,000 short tons, raw value (preliminary) up about 115,000 tons from November 1966 and up about 12,000 tons from December 1965. January-December 1966 deliveries 10,301,000 short tons, raw value (preliminary), up 280,000 tons from January-December 1965. Final data for November 1966 deliveries 759,000 short tons, raw value, same as previously published.
2. Primary distributors' stocks December 31, 1966 were 2,536,216 short tons, raw value (preliminary), down 112,000 tons from a year ago and up 394,000 tons from end November 1966. During December refiners' stocks increased by 33,000 tons, beet processors' stocks by 322,000 tons and mainland cane processors' stocks by 48,000 tons. Importers of direct consumption sugar stocks decreased by 8,000 tons.
3. Charges to quotas calendar year 1966 were 10,356,699 short tons, raw value.
4. Regionally, January-November sugar deliveries, 1966 as compared to 1965 were up in all of the regions: -- Increases -- South 8.8 percent, New England 3.3 percent, Middle Atlantic 2.8 percent, North Central 2.3 percent, and South 0.6 percent.
5. Corn sirup distribution November 1966 -- the equivalent of 97,000 short tons, raw value, down 11,000 tons from October 1966 and down 10,000 tons from November 1965. Distribution of dextrose November 1966 -- the equivalent of 41,000 short tons, raw value, down 3,000 tons from October 1966 and the same as November 1965.

Table 1. - Sugar supply and disposition by primary distributors, January-November 1966

(Short tons, raw value)

1/ Spot prices are for bulk sugar under Contract No. 10 which, beginning November 21, 1966, replaces Contract No. 7. The terms of these contracts are duty paid or duty free, full duty rate .625 cent per pound.

2/ Spot prices are those under No. 8 Contract which is for bagged sugar f.o.b. and stowed at Greater Caribbean ports (including Brazil).

3/ The No. 10 "Domestic Bulk" Contract has been adjusted by deducting duty (.625¢), computed freight from the Greater Caribbean ports (including Brazil), insurance and unloading charges and adding the bag allowance (currently .055¢) before calculating the differential from No. 8 "World" Contract spot prices.

4/ These are basis prices in 100-pound paper bags, NOT delivered prices. To obtain delivered prices add "Freight Prepays" and deduct discounts and allowances. For illustration see Sugar Reports 81, January 1959, pages 5 to 9.

5/ December 1966 estimated same as November 1966.

Supplement to SUGAR STATISTICS, Volume II, for Mainland cane,  
Louisiana, and Florida

This supplement brings to date Statistical Bulletin No. 244, "Sugar Statistics and Related Data," Volume II (revised), issued July 1963 as it relates to the Mainland cane area, Louisiana and Florida.

Some readers may want to transcribe the data appearing in this supplement to the tables in that bulletin. A cross-reference of the tables in this supplement to the corresponding tables in Volume II is shown below. Supplements to Volume II for the Mainland cane area, Louisiana and Florida appear in February and April 1964 and January 1965 and 1966 issues of Sugar Reports.

Copies of Statistical Bulletin No. 244 may be obtained upon request to the Information Division Agricultural Stabilization and Conservation Service, U. S. Department of Agriculture, Washington, D C., 20250.
